

Current Status of Vegetative Compatibility Groups in *Fusarium oxysporum*: Supplement (1999)

Talma Katan¹ and P. Di Primo²

Thirty-four *formae speciales* (ff.sp.) of *Fusarium oxysporum* which have been subjected to vegetative compatibility group (VCG) analysis are listed, along with their updated 3-digit numerical codes. Ten of these ff.sp. are listed for the first time, bringing to 49 the total number of VCG-analyzed, listed ff.sp. New and corrected entries are tabulated for the remaining 24 ff.sp.

KEY WORDS: *Fusarium oxysporum*; systematic numbering; VCG coordination; vegetative compatibility.

Contribution No. 516/99 from the Inst. of Plant Protection, Agricultural Research Organization. Received Aug. 26, 1999; received in final form Oct. 3, 1999; <http://www.phytoparasitica.org> posting Oct. 7, 1999.
