

A Survey of the Eriococcidae (Hemiptera: Coccoidea) of Ankara Province, Turkey

S. Ülgentürk,^{*,1} M.B. Kaydan,¹ S. Toros¹ and M.O. Gürkan¹

The Coccoidea of cultivated and non-cultivated areas of Ankara Province, in central Anatolia, Turkey, were surveyed between 1999 and 2001. Eleven species of Eriococcidae were collected, of which nine are new records for Turkey: *Acanthococcus greeni* Newstead, *A. micracanthus* Danzig, *A. munroi* Boratynski, *A. roboris* (Goux), *A. zernae* Tereznikova, *Rhizococcus cingulatus* (Kiritchenko), *R. cynodontis* (Kiritchenko), *R. herbaceus* Danzig and *R. pseudinsignis* (Green).

KEYWORDS: Faunal survey; Eriococcidae; *Acanthococcus*; *Gossyparia*; *Rhizococcus*; Ankara; Turkey; new records.

Received Feb. 23, 2003; received in final form April 10, 2003; <http://www.phytoparasitica.org> posting Sept. 30, 2003.
